

Understanding the local job market can help you make well-informed decisions about your career. Here are some key insights into the labour market in the East Riding area:

- Growing Sectors: The East Riding area has seen significant growth in sectors such as health and social care, renewable energy, manufacturing, and construction. These industries are expected to continue expanding, providing new job opportunities for those with the right skills and training.
- Agriculture and Food Production: Given the rural landscape, agriculture and food production remain important, offering both seasonal and long-term roles in farming, food processing, and supply chain management.
- Tourism and Hospitality: The region's attractions, including the Yorkshire Wolds and coastal areas, contribute to a strong tourism and hospitality sector, particularly during peak holiday seasons. Roles in hotels, restaurants, and leisure activities are plentiful.
- Renewable Energy: With the Humber region developing as a hub for renewable energy, there are increasing opportunities in wind energy, engineering, and environmental science. This sector continues to attract investment and create high-skilled job roles.
- Transportation and Logistics: The East Riding's strategic location, with easy access to major ports and transport networks, supports a vibrant logistics and distribution industry. There are many opportunities for careers in warehousing, driving, and supply chain management.

Current Job Trends

- Demand for Healthcare Professionals: The health and social care sector has a high demand for nurses, carers, and healthcare assistants. With an aging population, these roles are projected to remain critical in the coming years.
- Construction and Trade Roles: As the area develops, there is a consistent need for skilled tradespeople, including electricians, plumbers, and construction workers.
- Digital and Tech Skills: There is a growing requirement for individuals with digital skills, especially as more businesses move online or adopt new technologies.
